

To install and use these files in Mekko Graphics

- 1) Extract all files to the desired location on your local or network drive
- 2) Open the Preference Manager

To access the Preference Manager, Mekko Graphics must be installed on your machine. Once Mekko Graphics is installed, simply go to the Mekko Graphics tab in PowerPoint and select Preference Manager.

3) Adding a Theme

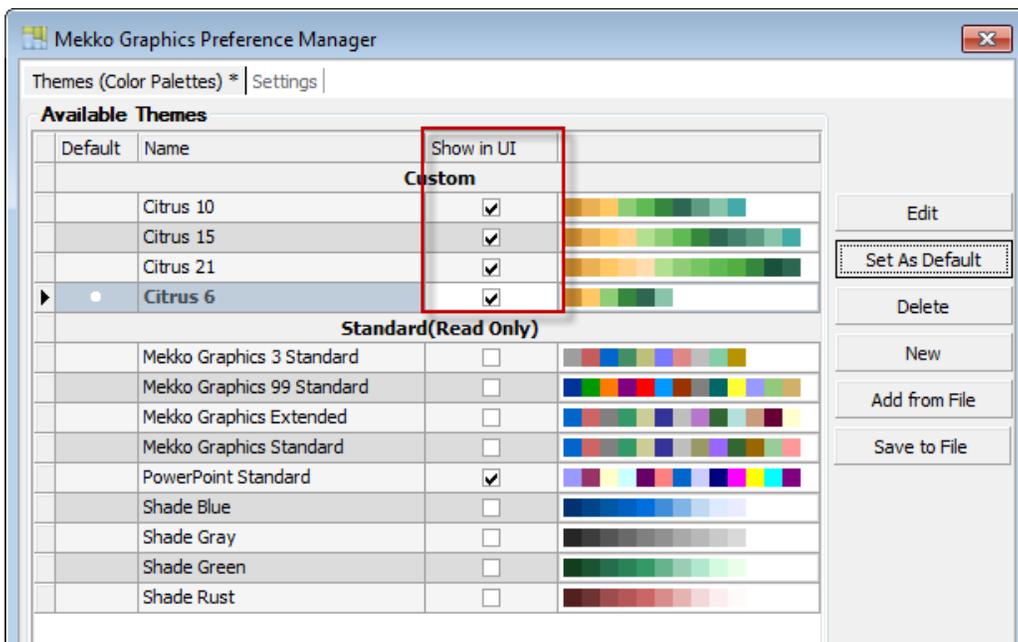

To add these themes to Mekko graphics' collection of themes

- click the **Add from File** button,
- navigate to the location of files extracted in step 1,
- select theme file to add.

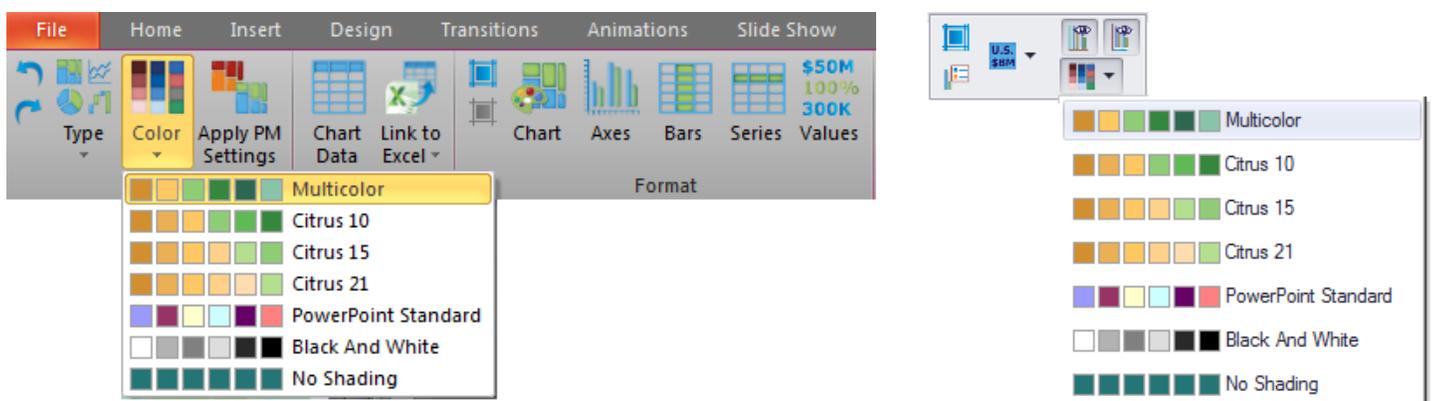

If you want to add multiple files to list you should add them one by one.

4) Choosing themes to display in Colors Drop down List on Edit Chart tab and Chart Context menu mini-toolbar.

You can choose which themes to display in Mekko Graphics. Choose which themes will be visible by checking the checkbox in the Show in UI column.

Those themes checked will be the themes available to you in the Color dropdown box in the Edit Chart Toolbar and right click mini-toolbar.

Notice that the theme you designate as a default theme will be portrayed as your Multicolor theme in Mekko Graphics.
